

Step 10 - Identity Auditing & Investigation

Sunday, 31 May 2026 11:25 AM

Test User Overview

Objective

Review user account details and current identity status.

Actions Performed

- . Opened Test User account overview.
- . Reviewed account properties and membership information.

Skills Practiced

- . User administration
- . Identity investigation
- . Access validation

Outcome

Confirmed account status, memberships, assigned roles, and user attributes.

Test User Groups

Objective

Review group-based access assignments.

Actions Performed

- . Opened user group memberships.
- . Reviewed assigned security groups.

Skills Practiced

- . Group management
- . Access governance
- . Identity administration

Outcome

Verified Test User membership within the SOC-Analysts security group.

Test User Azure Role Assignments

Objective

Review resource-level permissions assigned to the user.

Actions Performed

- . Opened Azure Role Assignments.
- . Reviewed assigned permissions.

Skills Practiced

- . RBAC analysis
- . Access reviews
- . Permission auditing

Outcome

Verified current Azure role assignments for the user account.

Audit Log Details

Objective

Investigate a recorded identity-related administrative action.

Actions Performed

- . Opened detailed audit log entry.
- . Reviewed activity information, actor details, and operation status.

Skills Practiced

- . Audit investigation
- . Change tracking
- . Identity governance
- . Compliance monitoring

Outcome

Verified successful execution of the "Add member to group" activity.

Confirmed Microsoft Entra ID recorded the event timestamp, actor information, correlation ID, and operation status for audit purposes.
