

Step 12 - User Deprovisioning (Leaver Process)

Sunday, 31 May 2026 12:37 PM

All Users Overview

Objective

Identify user accounts prior to deprovisioning activities.

Actions Performed

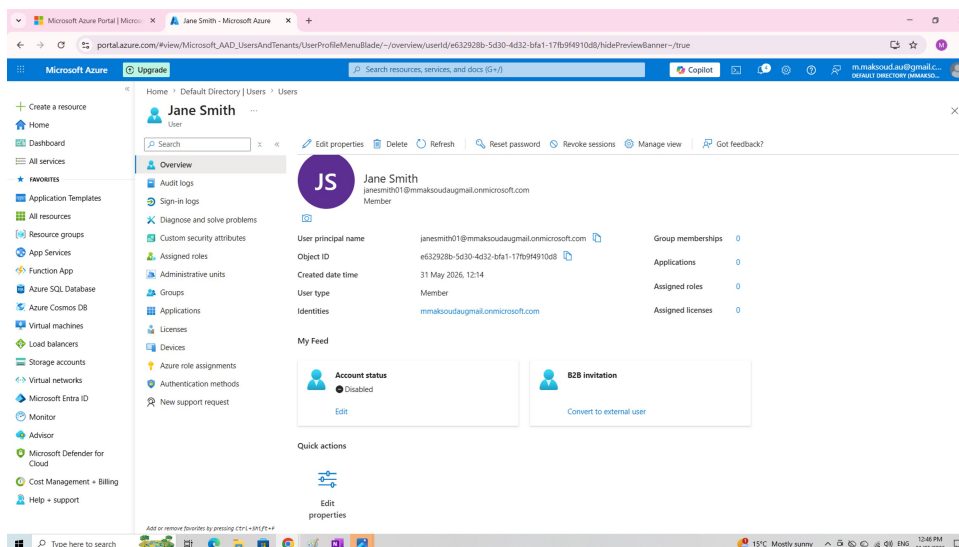

- . Reviewed existing user accounts in Microsoft Entra ID.
- . Identified the target user account for deprovisioning.

Skills Practiced

- . Identity administration
- . User management
- . Identity governance

Outcome

Selected JaneSmith01 for deprovisioning while maintaining other active identities.

User account successfully disabled

Objective

Simulate the offboarding of a departing employee by removing access to organizational resources.

Actions Performed

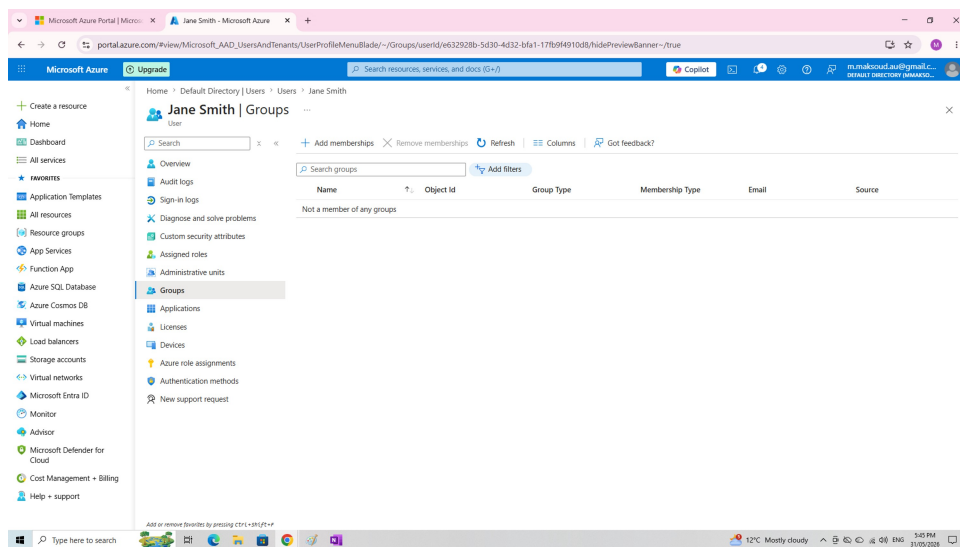

- . Opened the JaneSmith01 user account.
- . Reviewed user account details.
- . Disabled the account through Microsoft Entra ID.
- . Verified the account status changed from Enabled to Disabled.

Skills Practiced

- . Identity lifecycle management
- . User deprovisioning
- . Access control
- . Microsoft Entra ID administration

Outcome

The user account was successfully disabled, preventing authentication and access to organizational resources.

Jane Smith - Group Membership Review

Objective

Review group memberships during the user deprovisioning process.

Actions Performed

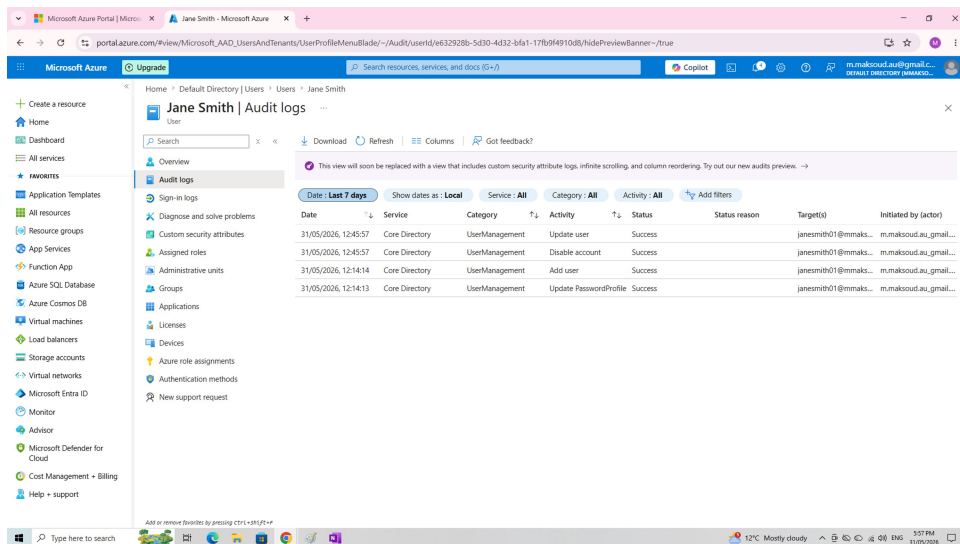

- . Opened the JaneSmith01 user account.
- . Navigated to the Groups section.
- . Reviewed all assigned group memberships.
- . Confirmed the user was not assigned to any security groups.

Skills Practiced

- . Identity governance
- . Access reviews
- . User lifecycle management
- . Microsoft Entra ID administration

Outcome

Verified that the user was not a member of any groups and therefore had no inherited permissions requiring removal during the offboarding process.

Jane Smith - User Deprovisioning Audit Logs

Objective

Verify that user offboarding actions were successfully recorded in Microsoft Entra ID audit logs.

Skills Practiced

- . Identity lifecycle management
- . User deprovisioning
- . Audit log analysis
- . Identity governance
- . Microsoft Entra ID administration

Outcome

Successfully confirmed that the user account was disabled and that the action was recorded in Microsoft Entra ID audit logs, providing an auditable record of the offboarding process.
