

Microsoft Entra ID IAM Lab - Project Overview

Saturday, 30 May 2026 4:23 PM

Project Objective

Develop hands-on experience with Microsoft Entra ID identity and access management functions including user administration, security groups, RBAC , authentication controls, and password management.

Lab Activities

Step 1 -Tenant Overview

- . Reviewed Microsoft Entra ID tenant configuration.
- . Examined tenant information and identity environment.

Step 2 - User Management

- . Created and reviewed a test user account.
- . Examined user properties and account status.

Step 3 - Security Groups

- . Created the SOC-Analysts security group.
- . Reviewed group configuration and management.

Step 4 - Group Membership Management

- . Added Test User to the SOC-Analyst group.
- . Verified group membership.

Step 5 - Role-Based Access Control (RBAC)

- . Reviewed Access Control (IAM).
- . Assigned Reader role to the SOC-Analysts group.
- . Verified role assignments.

Step 6 - User Lifecycle Management

- . Reviewed Test User profile.
- . Examined Authentication Methods.
- . Reviewed Assigned Roles.
- . Verified Group Memberships.

Step 7 Password & Account Management

- . Reviewed account administration controls.
- . Examined password reset functionality.
- . Reviewed session and account management options.

Step 8 -Access Reviews & Identity Governance

- . Reviewed group ownership and membership.
- . Examined Azure role assignments.
- . Validated access review concepts.

Step 9 - Sign-in Monitoring & Audit Logs

- . Reviewed user audit logs.
- . Examined sign-in activity.
- . Verified identity-related events.

Step 10 - Identity Auditing & Investigation

- . Investigated user account activity.

- . Reviewed audit log details.
- . Validated account changes and group modifications.

Step 11 - User Provisioning (Joiner Process)

- . Created a new user account.
- . Verified successful user provisioning.
- . Reviewed account properties and status.

Step 12 - User Deprovisioning (Leaver Process)

- . Disabled a user account.
- . Reviewed group memberships.
- . Verified deprovisioning actions through audit logs.

Skills Demonstrated

- . Identity Administration
- . User Lifecycle Management
- . Security Group Management
- . Role-Based Access Control (RBAC)
- . Authentication Management
- . Password Administration
- . Identity Governance
- . Access Reviews
- . Audit Log Analysis
- . User Provisioning
- . User Deprovisioning
- . Microsoft Entra ID Administration
- . Documentation and Change Tracking

Technologies Used

- . Microsoft Entra ID
- . Azure Portal
- . Microsoft Entra Groups
- . Role-Based Access Control (RBAC)
- . Audit Logs
- . Sign-In Logs
- . Access Reviews
- . User Lifecycle Management
- . OneNote Documentation
